Topology and its Applications
Volume 148, Numbers 1–3, 28 February 2005

Contents

Contributions

P.-F. Yan and S.-L. Jiang
Countable sets, BCO spaces and selections 1

W. Kubiś, K. Sakai and M. Yaguchi
Hyperspaces of separable Banach spaces with the Wijsman topology 7

A. Fedeli and A. Le Donne
On a problem related to a non-squeezing theorem 33

M. Baillif
The homotopy classes of continuous maps between some nonmetrizable manifolds 39

J.R. Hughes
Partial conjugations suffice 55

W.D. Gillam
Embeddability properties of countable metric spaces 63

T. Sakasai
The Johnson homomorphism and the third rational cohomology group of the Torelli group 83

Y. Hara
The degree of equivariant maps 113

K. Yamazaki
Base-normality and product spaces 123

K. Fukui and T. Nakamura
A topological property of Lipschitz mappings 143

L. Mou
Compactness of certain bounded zero-sets in completely regular spaces 153

S. Greenwood and P. Nyikos
ω_1-compactness in type I manifolds 165

A.W. Hager and R.J. MacKenzie
A measurable cardinal associated with an epireflective subcategory of Hausdorff spaces 173

L.H. Kauffman and N.A. Krylov
Kernel of the variation operator and periodicity of open books 183

H.Y. Chu and J.S. Park
Attractors for relations in σ-compact spaces 201

P. Blagojević, V. Grujić and R. Živaljević
Arrangements of symmetric products of spaces 213

L.-X. Peng
On Σ^*-spaces and strong Σ^*-spaces of countable pseudocharacter 233

M. Hrušák, P.J. Szeptycki and Á. Tamariz-Mascarúa
Spaces of continuous functions defined on Mrówka spaces 239
